

Hinkle Contracting Landfill Division

Hinkle Contracting Company's Landfill Division has over 18 years experience in the horizontal expansion of existing landfill sites. Our specialties include, but are not limited to, cell construction, transfer stations, closure construction, sediment pond construction and cleaning, concrete leachate containment and piping. Hinkle's personnel are experienced in a wide range of requirements unique to landfill construction. Our personnel have the ability to individualize and complete projects, providing resources and experience to meet or exceed any customer's needs.

This division has constructed over 200 acres of contained landfill cells, closed approximately 60 acres of previously developed landfill containment area and constructed 15 acres of CD&D landfill cells.

Firms benefit from the level of professionalism Hinkle Contracting's Landfill Division offers, presenting a proven product, accessible resources, professional personnel and competitive pricing in every presented and completed project.
