

Hinkle Contracting Concrete Division

Hinkle Contracting Company's Concrete Division specializes in civil related construction applications. Projects include airport, highway paving, waterway port applications, culvert and bridge applications, retaining walls, building concrete, concrete structures and foundation construction.

The division currently performs construction in Kentucky, Tennessee, South Carolina, North Carolina, Georgia, Alabama and West Virginia as being certified and associated with KAHC, KCPA, ARBA, KRMCA, ACPA and the TCA. Various clients include federal, state, county, city governments and commercial, industrial and private enterprises.

One of our greatest strengths is performing on tough jobs which other companies will not pursue. Division personnel are experienced professionals who will manage, analyze and schedule projects to meet and exceed customer expectations realizing safe and productive results.
