

Hinkle Contracting Environmental Division

Hinkle Contracting Company's Environmental Services Group has the expertise, personnel, equipment and support group to address a wide variety of environmental issues. Our top priority is to provide quality service in a timely and cost competitive manner while addressing the customer's needs.

This division can perform environmental site assessment, underground storage tank removal and remediation, remediation of hazardous waste sites, slope stabilization, waste and landfill projects, drilling applications and additional remedial applications.

One of the greatest strengths for this division is addressing the customer's needs, while completing project on time and within budget.
